OUR CANADIAN RAILWAYS.

In nothing has Canada progressed more clearly indicated during the past fifty years than in the development of our railway system. The Annual Report of the Dominion Department of Railways and Canals has just been published, and from that official record we glean the following facts and figures, which may interest many readers of THE BEAVER.

It was in the year 1831 that the first railway in Canada was put in operation. The road extended from the St. Lawrence River, south of Montreal, to the town of St. John, a distance of sixteen miles. That appears to have been the only road in operation until 1847 when 38 miles more were added, making 54 miles in all. In 1850 another 13 miles addition was made, and then the work of railway building appears to have commenced in earnest. The following year 120 miles were reported; in 1853, there were 200 miles; in 1854, 250 miles; in 1855, 300 miles; in 1856, 350 miles; in 1857, 400 miles; in 1858, 450 miles; in 1859, 500 miles; in 1860, 550 miles; Coughs and colds need not be endured; they can be cured, and that quickly.

Many mixtures are temporary in effect, but Scott's Emulsion of Cod-Liver Oil with Hypophosphites is a permanent remedy.

The oil feeds the blood and warms the body; the hypophosphites tone up the nerves; the glycerine soothes the inflamed throat and lungs.

The combination cures. This may prevent serious lung troubles.
